Meet BTS staff and see our products during the Transportation Research Board Annual Meetings at Booth #835 in the Exhibits Hall.

RECENT BTS PRODUCTS AND ACTIVITIES

- BTS published over 100 products, including 82 data releases, 3 reports to Congress, annual reports for clients of the confidential close calls program, monthly updates to National Transportation Statistics, continuous updates and expansions to the National Transportation Atlas Database, an annual update to the Freight Analysis Framework, a mobile app, and several web apps. All are available at www.bts.gov.
- *Transportation Statistics Annual Report 2019* highlights how emerging transportation technology, the Foundations of Evidence-based Policymaking Act, and the Geo-spatial Data Act affect transportation data needs and programs.
- BTS is shifting from publishing static reports to creating continuously updated products on the web, assuring that the most up-to-date statistics and maps are available, starting with *Freight Facts and Figures*. *Transportation Economic Trends* will be converted in early 2020.
- BTS released the national bike-share and e-scooter map and the Access to Intercity Transportation in Rural Areas map. See www.bts.gov/topics/passenger-travel.
- BTS continues to expand the on-line repository of documents and data of interest to the transportation community in the National Transportation Library, including all research documents funded by DOT.
- The VIUS is returning! BTS has initiated work with the Census Bureau on conducting the 2021 Vehicle Inventory and Use Survey. See www.bts.gov/vius for additional information.
- BTS is undertaking a major effort to improve revenue, expenditure, and financial statistics relevant to transportation decision makers. For further information, contact Stephanie.Lawrence@dot.gov.
- BTS is sponsoring a Commodity Flow Survey Workshop on April 2-3, 2020, in Washington, D.C. Go to www.trb.org/calendar for additional information and to register. Early bird registration ends February 3, 2020.

BTS POSITION OPENINGS

- See the jobs and internships section under “Learn About BTS and Our Work” at www.bts.gov.
- BTS is recruiting statisticians at the GS-11 through GS-14 levels.
- BTS is recruiting a cartographer at the GS-12/13 level.
- BTS will soon be recruiting a managing director for the National Transportation Library. The position is at the GS-14 level with promotion potential to GS-15. Please watch for an announcement in USA Jobs.
- BTS is currently seeking Fellows interested in bringing transformational change to the Federal Government in library science, geo-spatial analysis, data journalism, and off-shore oil and gas industry risk analysis.
